01

RENTAL MANAGEMENT

We offer the right services to manage all stages of your property's rental. Our team works around the clock to make sure the guests experience a five star stay. Most importantly, we keep your property to a high standard.

Optimisation

Property Marketing

We believe every property owner deserves a custom-made plan, tailored to his needs. After a personal meeting we will inspect, and if necessary optimise, the property in order to target the right audience. Thanks to our specialisation in interior design, photography and online marketing we are able to create a visually appealing presentation of each holiday home.

Efficiency

Property Management System

To coordinate all channels, communication, tasks and different teams we use a Property Management System. This system allows us to respond 24/7 and ensure each guest will have a response within one hour. Our back-end contains several systems to work as effective as possible. This allows us to do personal check-ins, organize cleaning and laundry services, inspect the property after each rental and respond to issues during rentals.

Broadcasting

Channel Manager

Our professional services ensure a higher annual profit by achieving a high occupancy rate. Each property will be listing on more than 15+ affiliated rental platform to target a broad international audience.

Algorithm

Dynamic Pricing

Each property will be subjected to a market intelligence report, to find out how similar properties are listed on all mayor platforms. We connect your property to a dynamic pricing system. This system will update the price taking the occupancy rate, orphan days, social events and international holidays into account. It has been proven to be very effective to generate a high annual income.

Arrival

Guest Package

Each guest will receive a personal welcome package containing fresh towels, toothpaste, shampoo and a bottle of local wine. In addition, we restock all basic amenities like water, fruit, toilet paper and kitchen supplies before every check-in.

Preparation

Cleaning & Laundry

We value the quality of our work and services. By communicating with our cleaning staff through a visual application, we are always up to date about each holiday home. These automation services reduce errors and allow us to solve situations within the short transition period between check-out and check-ins.
